**Details:**

***This type of collectable glass inherently has mold lines and mold marks, minor defects, internal bubbles, and swirls of color. Please review all photos and ask questions.***

Graded higher due to rarity. There is a horizontal mold separation line in the loop handle. In person, it can be seen that the glass flowed in both directions to this defect (see photos). There is one embedded dark spot on one of the juicer vanes, and one in the bottom of the reamer bowl. There is an indentation deformation on the rim near the handle (see photos). There are molding deformation on the vanes near the intersection of the cone and reamer bowl (see photos). I have seen a photo showing two others of this reamer, and I was also told those were the only others known to exist.
